

Hello FCC,

I would like to share my comments about NAB's petition 04-160 and my choices for radio listening.

I have subscribed to XM satellite radio for ~8 months now and really enjoy the variety and quality that I cannot find on my radio locally (am/fm). I gladly pay monthly for my subscription to get this quality and believe that XM is providing me excellence in broadcast radio that I have never heard before.

I would be greatly dissatisfied if these choices were diminished or eliminated. XM has expanded my listening enjoyment, and believe that my monthly fees are fair for this service. I am also anxious to receive instant traffic and weather in my area when it becomes available.

Since I pay for this quality of service, I feel that I should have all listening and broadcasting options available to me. The services of music, instant weather, and data to my auto or home unit should be fully available when I opt. to pay for this quality.

Please consider my comments and feedback when making a decision to NAB's petition 04-160. I hope that you strongly consider to vote against this petition so that I may continue to receive XM's full quality of service.

Thank you,

ward wolfram
